

## **Sustainability Policy**

Plus Dynamique EURL is committed to sustainability, in which economic efficiency and environmental protection is pursued and our social and corporate ideals are maintained. We will do this by:

### **Delivering Business Improvement**

- Adopting a long-term perspective across our business operations [SEP]
- Continuously improving our value management approach by working collaboratively to enable more efficient use of resources and more effective delivery of whole-life value to our customers.
- Designing solutions that are fit for purpose, sustainable and resource efficient [SEP]
- Developing and delivering sustainable procurement practices that allow us to secure our supply chain and reduce whole-life costs whilst minimising environmental damage. [SEP]

### **Reducing our Environmental Footprint [SEP]**

- Understanding our carbon footprint and developing strategies to reduce our operational carbon emissions. [SEP]
- Continuing to reduce the generation of waste from our operations [SEP]
- Procuring and using materials which have the smallest environmental and social impact yet remain economical. [SEP]
- Reducing our consumption of water and fossil fuels by using alternative solutions wherever feasible. [SEP]

### **Nurturing our Prosperous Partnerships [SEP]**

- Seeking to make a long-term contribution to society through our community investment, as well as the infrastructure and services we provide. [SEP]
- Working collaboratively with our clients and supply chains to reduce our collective administrative burdens. [SEP]
- Remaining industry-recognised as the employer of choice, by maintaining our excellent safety performance, [SEP] investment in people and career opportunities. [SEP]

Our aspirations are underpinned by a constantly evolving approach to delivery, and we aim to be a learning organisation able to anticipate, influence and respond to the rapidly changing sustainability agenda.
