

Sustainability Policy

Plus Dynamique EURL is committed to sustainability, in which economic efficiency and environmental protection is pursued and our social and corporate ideals are maintained.
We will do this by:

Delivering Business Improvement

- Adopting a long-term perspective across our business operations ^[L]_[SEP]
- Continuously improving our value management approach by working collaboratively to enable more efficient use of resources and more effective delivery of whole-life value to our customers.
- Designing solutions that are fit for purpose, sustainable and resource efficient ^[L]_[SEP]
- Developing and delivering sustainable procurement practices that allow us to secure our supply chain and reduce whole-life costs whilst minimising environmental damage. ^[L]_[SEP]

Reducing our Environmental Footprint ^[L]_[SEP]

- Understanding our carbon footprint and developing strategies to reduce our operational carbon emissions. ^[L]_[SEP]
- Continuing to reduce the generation of waste from our operations ^[L]_[SEP]
- Procuring and using materials which have the smallest environmental and social impact yet remain economical. ^[L]_[SEP]
- Reducing our consumption of water and fossil fuels by using alternative solutions wherever feasible. ^[L]_[SEP]

Nurturing our Prosperous Partnerships ^[L]_[SEP]

- Seeking to make a long-term contribution to society through our community investment, as well as the infrastructure and services we provide. ^[L]_[SEP]
- Working collaboratively with our clients and supply chains to reduce our collective administrative burdens. ^[L]_[SEP]
- Remaining industry-recognised as the employer of choice, by maintaining our excellent safety performance, ^[L]_[SEP] investment in people and career opportunities. ^[L]_[SEP]

Our aspirations are underpinned by a constantly evolving approach to delivery, and we aim to be a learning organisation able to anticipate, influence and respond to the rapidly changing sustainability agenda.
